

Robotics and drones

Machines that could **revolutionize our everyday life**

Open End PERLES on the Solactive Robotics and Drones NTR Index

Machines that could revolutionize our everyday life

Robotic systems support physicians with minimally invasive interventions, and unmanned aircraft monitor the irrigation of farmland and protect rhinoceros from extermination by poachers. These are not scenes from a science fiction movie, but situations from our present. The enormous progress in robotics made over the last few years make all of this possible: Experts presume the robot and drone industry will significantly change our everyday lives in the future, and say it has enormous economic potential. Robots are popping up in many areas, such as production facilities, the health care sector and the service sector. And they influence decisive economic factors – work costs, productivity, flexibility and safety.

The robotics sector can therefore look forward to a great future, which means it will also increase in interest for investors. The reason for the rapid progress is above all the constant further development of the relevant technologies. Robots are becoming increasingly performant, due to the improvement in sensors, increased precision and through artificial intelligence.

Progress means independence

Progress means independence in the robotics industry. According to McKinsey, robots will in eleven years' time already be capable of producing high-quality goods and noticing and improving errors- not only their own, but also the errors of other robots and human beings. Despite constant further developments, the acquisition costs for many robots are getting lower and lower, so that gradually they may also be attractive to consumers. One of the first robots to make the transition into private households is the fully automatic vacuum cleaner. The company iRobot has now developed many other household helpers, such as pool and guttering cleaners. At the moment it is not yet possible to estimate conclusively the areas where robots will be actively supporting human beings in their everyday lives by 2025, but there are likely to be many. The economic importance of robots and drones should be correspondingly high in future.

Transparent index process

Based on the specifications of the index provider Solactive AG, the Solactive Robotics and Drones indices target the pioneers in the robotics and drones industry. Only companies that meet several quality standards are included on the shortlist. Every index member needs to demonstrate that a significant share of its business is focused on the robotics and drones sector, or that the company is currently developing its own robotics and drones division with the potential to bring in a major share of overall revenue. The concept of the indices also takes account of the dynamic environment of this highly innovative business segment, as at pre-sent no-one knows what direction the developments of robotics and drones will take and which companies will ultimately dominate. The respective index concept therefore provides for a "fast entry" rule alongside the twice-yearly index adjustments, which take place in March and September: This ensures that stock companies can be incorporated in the index at any time, e.g. immediately after an initial public offering, provided they meet the quality standards.

This also means that the equities of each company have to be listed with an exchange that grants trading access to foreign investors without restrictions. Furthermore, to be included in the index, market capitalization must amount to at least 100 million US dollars and the average daily trading volume for the past three months must amount to at least 600,000 US dollars for reasons of liquidity. When the index is adjusted, all index members are weighted equally, whereas companies with a market capitalization below 1 billion US-Dollar are capped at 5.0%.

The product solutions

The UBS Open End PERLES on the Solactive Robotics and Drones indices track the performance of the underlying index, which reinvests any net dividends from index members after deducting the management fee of 0.75 percent without limited maturity.

Opportunities

- Equity-linked participation in the growth potentials of the robotics and drones industry.
- Transparent and targeted index structure that can also add new index members at any time ("Fast Entry" rule) in order to react quickly to the development dynamics in the robotics and drones sector.
- The selection of index members from the robotics and drones sector, to which special growth potential can be assigned is carried out by the index provider Solactive AG.
- Diversification within the robotics and drones sector through several equities with a regular index review twice a year.
- Tradable every trading day under normal trading conditions.
- No fixed term restriction.

Risks

- No capital protection: investors run the risk of losing their investment if the price of the underlying index worsens.
- The robotics and drones sector is a relatively young economic sector and it is not yet certain whether it will fulfil its expectations and which companies will actually succeed.
- Investors bear the issuer risk and could lose their investment if the issuer files for bankruptcy.
- The issuer intends to ensure liquidity in normal market phases on trading days. However, investors should realize that they may not be able to buy/sell the product at any point in time.
- As the stocks included in the index may be listed in different currencies and the product does not have any currency hedges, the investor may also be exposed to an exchange rate risk, which may adversely affect the value of the product.

- The issuer has the right to terminate the product if certain conditions are met.

UBS may have or have had a relationship with entities referred to in the Information. Neither UBS nor any of its affiliates, or their officers or employees, accepts any liability for any loss arising from use of the Information.

This presentation is not a basis for entering into a transaction. Any transaction between you and UBS will be subject to the detailed provisions of the term sheet, confirmation or electronic matching systems relating to that transaction. Clients wishing to effect transactions should contact their local sales representative.

This information is communicated by UBS AG and/or its affiliates ("UBS"). * (see below) UBS may from time to time, as principal or agent, have positions in, or may buy or sell, or make a market in any securities, currencies, financial instruments or other assets underlying the product to which this [term sheet / document] relates (the "Structured Product"). UBS may provide investment banking and other services to and/or have officers who serve as directors of the companies referred to in this [term sheet / document]. UBS's trading and/or hedging activities related to the Structured Product may have an impact on the price of the underlying asset and may affect the likelihood that any relevant barrier or relevant trigger event is crossed or triggered. UBS has policies and procedures designed to minimise the risk that officers and employees are influenced by any conflicting interest or duty and that confidential information is improperly disclosed or made available. UBS may pay or receive brokerage or retrocession fees in connection with the Structured Product described herein. In respect of any Structured Product that is a security, UBS may, in certain circumstances, sell the Structured Product to dealers and other financial institutions at a discount to the issue price or rebate to them for their own account some proportion of the issue price. Further information is available on request. Structured Products are complex and may involve a high risk of loss. Prior to purchasing the Structured Product you should consult with your own legal, regulatory, tax, financial and accounting advisors to the extent you consider it necessary, and make your own investment, hedging and trading decisions (including decisions regarding the suitability of the Structured Product) based upon your own judgement and advice from those advisers you consider necessary. Save as otherwise expressly agreed in writing, UBS is not acting as your financial adviser or fiduciary in relation to the Product. UBS generally hedges its exposure to Structured Products, although it may elect not to hedge or to partially hedge any Structured Product. UBS's hedging activity may be conducted through transactions in the underlying asset, index or instrument or in options, futures or other derivatives related to the underlying asset, index or instrument on publicly traded markets or otherwise, and may have an impact on the price of the underlying asset. If a transaction is cash settled, UBS will generally unwind or offset any hedge it has for such Structured Product in close proximity to the relevant valuation time or period. In some cases, this activity may affect the value of the Structured Product. Unless stated otherwise in this document, (i) this document is for information purposes only and should not be construed as an offer, personal recommendation or solicitation to purchase the Structured Product and should not be treated as giving investment advice, and (ii) the terms of any investment in the Structured Product will be exclusively subject to the detailed provisions, including risk considerations, contained in the more detailed legal documentation that relates to the Structured Product (being the confirmation, information memorandum, prospectus or other issuer documentation as relevant). UBS makes no representation or warranty relating to any information herein which is derived from independent sources. This document shall not be copied or reproduced without UBS's prior written permission. In respect of any Structured Product that is a security, no action has been or will be taken in any jurisdiction that would permit a public offering of the Product, save where explicitly stated in the issuer documentation. The Structured Product must be sold in accordance with all applicable selling restrictions in the jurisdictions in which it is sold.
