

UBS Exchange Traded Trackers (ETTs)

The efficient index highways.

ETT stands for Exchange Traded Tracker, a product that allows efficient, low-cost and transparent investments in the world of indices.

UBS ETTs are based on total return or net total return indices. There are two types of share indices: total return and price return indices. Total return indices track not only the price movement of the underlying asset, but also its dividends. Most comparable index investments charge a management fee. UBS ETTs do not*. As a result, investors can participate fully in the performance of the underlying index.

UBS ETTs are highly transparent investments that track their underlying indices on a one-to-one basis. Furthermore, since they are traded on the Scoach derivatives exchange, they offer significant investment flexibility and liquidity.

Benefits at a glance – UBS ETTs are:

Uncomplicated:

1:1 participation in the underlying asset; no expiration.

Low cost:

0.00% management fees* and a narrow bid/ask spread.

Efficient:

dividends are reinvested (total/net total return).

Transparent:

traded on the Scoach derivatives exchange.

UBS Exchange Traded Trackers (ETTs)

Strategy

UBS ETTs support a range of investment strategies pursued by institutional and private investors – from intraday trading to long-term wealth management:

- Long-term investors are interested in low management fees. This enables them to track the index on a truly one-to-one basis.
- Short-term investors, on the other hand, seek to exploit index movements. As a result, they rely heavily on real-time quotes, tight spreads and high liquidity

Risks

- UBS ETTs are tracker certificates assigned to the SSPA's "Participation" category (SSPA code 1300). They track the performance of the index on the downside as well as the upside, and thus do not offer capital protection.
- Investors bear the risk that the issuer will default (issuer risk).

Further information and contact

Please contact us over +41-44-239 76 76 or by e-mail on keyinvest@ubs.com if you have any questions. Details, legal information and current product terms and conditions are available on our website www.ubs.com/ett

Mechanism

UBS ETTs represent a passive investment strategy as products that track the movements of an underlying index. The underlying assets are total return or net total return indices that accrue dividends or net dividends.

Normally, investors would have to purchase the individual index components directly to obtain total returns, which involves additional costs. But this is not the case with ETTs. Instead, a single transaction can give investors exposure to index price movements without tracking errors.

This information is communicated by UBS AG and/or its affiliates ("UBS"). UBS may from time to time, as principal or agent, have positions in, or may buy or sell, or make a market in any securities, currencies, financial instruments or other assets underlying the product to which this document relates (the "Product"). UBS may provide investment banking and other services to and/or have officers who serve as directors of the companies referred to in this document. UBS's trading and/or hedging activities related to the Product may have an impact on the price of the underlying asset and may affect the likelihood that any relevant barrier is crossed. UBS has policies and procedures designed to minimise the risk that officers and employees are influenced by any conflicting interest or duty and that confidential information is improperly disclosed or made available.

In certain circumstances UBS sells the Product to dealers and other financial institutions at a discount to the issue price or rebates to them for their own account some proportion of the issue price. Further information is available on request.

Structured products are complex and may involve a high risk of loss. Prior to purchasing the Product you should consult with your own legal, regulatory, tax, financial and accounting advisors to the extent you consider it necessary, and make your own investment, hedging and trading decisions (including decisions regarding the suitability of the Product) based upon your own judgement and advice from those advisers you consider necessary. Save as otherwise expressly agreed in writing, UBS is not acting as your financial adviser or fiduciary in relation to the Product.

Unless stated otherwise in this document, (i) this document is for information purposes only and should not be construed as an offer, personal recommendation or solicitation to purchase the Product and should not be treated as giving investment advice, and (ii) the terms of any investment in the Product will be exclusively subject to the detailed provisions, including risk considerations, contained in the information memorandum, prospectus or other issuer documentation for the issue of the Product.

UBS makes no representation or warranty relating to any information herein which is derived from independent sources. This document shall not be copied or reproduced without UBS's prior written permission.

No action has been or will be taken in any jurisdiction that would permit a public offering of the Product, save where explicitly stated in the issuer documentation. The Product must be sold in accordance with all applicable selling restrictions in the jurisdictions in which it is sold.
