

UBS Exchange Traded Trackers (ETTs)

The efficient index highways.

ETT stands for Exchange Traded Tracker, a product that allows efficient, low-cost and transparent investments in the world of indices.

UBS ETTs are based on total return or net total return indices. There are two types of share indices: total return and price return indices. Total return indices track not only the price movement of the underlying asset, but also its dividends. Most comparable index investments charge a management fee. Most UBS ETTs do not*. As a result, investors can participate fully in the performance of the underlying index.

UBS ETTs are highly transparent investments that track their underlying indices on a one-to-one basis. Furthermore, since they are traded on the SIX SP exchange, they offer significant investment flexibility and liquidity.

Benefits at a glance – UBS ETTs are:

Uncomplicated:

1:1 participation in the underlying asset; no expiration.

Low cost:

Low management fees* and narrow bid/ask spreads.

Efficient:

dividends are reinvested (total/net total return).

Transparent:

UBS ETTs are tradeable on the SIX SP exchange.

UBS Exchange Traded Trackers (ETTs)

Strategy

UBS ETTs support a range of investment strategies pursued by institutional and private investors – from intraday trading to long-term wealth management:

- Long-term investors are interested in low management fees. This enables them to track the index on a truly one-to-one basis.
- Short-term investors, on the other hand, seek to exploit index movements. As a result, they rely heavily on real-time quotes, tight spreads and high liquidity

Risks

- UBS ETTs are tracker certificates assigned to the SSPA's "Participation" category (SSPA product type 1300). They track the performance of the index on the downside as well as the upside, and thus do not offer capital protection.
- Investors bear the risk that the issuer will default (issuer risk).

Further information and contact

Please contact us over +41-44-239 76 76 or by e-mail on keyinvest@ubs.com if you have any questions. Details, legal information and current product terms and conditions are available on our website www.ubs.com/ett

Mechanism

UBS ETTs represent a passive investment strategy as products that track the movements of an underlying index. The underlying assets are total return or net total return indices that accrue dividends or net dividends.

Normally, investors would have to purchase the individual index components directly to obtain total returns, which involves additional costs. But this is not the case with ETTs. Instead, a single transaction can give investors exposure to index price movements without tracking errors.

Based on monthly closing value of the index and the monthly fair value of the ETT (theoretical calculation). Past and calculated performance does not indicate future results. Source: Bloomberg, UBS AG

It has not been prepared for the needs of a specific recipient. It is only published for information purposes and does not constitute an offer or an invitation to purchase or sell securities or associated financial instruments ("Instruments"). UBS accepts no liability (either expressly or tacitly) for the completeness or reliability of the information contained in this document ("information") except for the information on UBS AG and its affiliates. The information should not be regarded by the recipients as a substitute for their own judgment. All the opinions contained herein may change without prior notice and contradict the opinions of other business areas of UBS due to the application of different assumptions and criteria. UBS is not obliged to keep the information up to date. UBS, its executives, employees or clients may have or have had a participation in the instruments and may conclude transactions with them at any time. UBS may maintain or have maintained a relationship with the entities specified in this information. Neither UBS nor its affiliated companies, executives or employees are liable for losses resulting from the use of this information.

This document is not a basis for the conclusion of transactions. The detailed conditions of the termsheet and the confirmation and electronic adjustment systems relating to this transaction apply to all transactions between you and UBS. Clients who want to conclude transactions should contact the local sales employee responsible for them.

For instruments admitted to trading on a regulated EU market: UBS AG, its affiliates or subsidiaries may trade with respect to the instrument as a market maker or liquidity provider (according to the interpretation of these terms in the United Kingdom).

UBS may at any time, as principal or agent, have positions in, or may buy or sell, or make a market in any securities, foreign exchange, financial instruments or other assets underlying the product described in this document (the "Product"). UBS may render investment banking or other services for the companies listed in this document and/or employ persons who act as members of the board of directors at the said companies. The hedging and/or trading transactions of UBS in connection with the product may have an impact on the price of the underlying asset and on the likelihood that a relevant threshold value will be exceeded. UBS has set up guidelines and procedures which are designed to minimize the risk of its executives and employees being influenced by conflicts of duty and interest or the unauthorized disclosure or provision of confidential information.

Under certain conditions UBS will sell the product to dealers or other financial institutions at a discount on the issue price or refund them a portion of the issue price for its own account. Further information is available on request.

Structured products are complex and may involve a high risk of loss. Prior to entering into a transaction you should consult with your own legal, regulatory, tax, financial and accounting advisors to the extent you consider it necessary, and make your own investment, hedging and trading decisions (including decisions regarding the suitability of a transaction) based upon your own judgment and advice from those advisors you consider necessary. Save as otherwise expressly agreed, UBS is not acting as your financial advisor or fiduciary in any transaction.

Unless otherwise stipulated in this document, (i) this document is merely intended for information purposes and should not be construed as an offer, personal recommendation or invitation to purchase the product or regarded as investment advisory services and (ii) the conditions for any investment in the product are based solely on the detailed provisions, including the information about the risks, contained in the information memorandum, the prospectus or in any other of the issuer's documents connected with the issue of the product.

UBS gives no assurance or guarantee with regard to any information contained herein from an independent source. This publication may not be copied or reproduced without UBS's prior written permission.

No steps have or will be taken in any jurisdiction with regard to the admissibility of the public subscription offer for the product, unless expressly pointed out in the issuer's documents. The product may only be sold taking into account all the applicable sales restrictions of the respective jurisdiction.
