Bonus Payment	<p>On any Observation Date where all Underlyings close at or above the respective Bonus Level, a Bonus Payment of 1.828% (USD 18.28 per Denomination) is paid on the Bonus Payment Date immediately following the relevant Observation Date.</p> <p>Investors are only eligible to receive a Bonus Payment for a bonus period, if they purchased the Product on any day up to and including the respective Observation Date. If the Product is purchased after the Observation Date, Investors will not be entitled to a Bonus Payment for the bonus period(s) passed.</p> <p>Upon the occurrence of an Early Redemption Event, the Product will terminate in whole and there will not be any further Bonus Payments. For the avoidance of doubt, the Bonus Payment as of the relevant Observation Date on which an Early Redemption Event is deemed to have occurred is being paid out.</p>
Catch-up Feature	<p>If one or more Bonus payments have not been paid, the sum of these Bonus payments will be paid on the next following Bonus Payment Date, provided that all Underlyings close at or above the respective Bonus Level on the relevant Observation Date (additional to the Bonus payment for this Bonus Payment Date).</p> <p>The Bonus payment is also due in case of an Early Redemption Event.</p>
Quanto Style	The Redemption is not subject to the EUR/USD exchange rate.
Quoting Type	Secondary market prices are quoted in percentage and dirty; accrued interest is included in the price.

Expiration Date ("Expiry")	21 December 2020 (subject to Market Disruption Event provisions)
Redemption Date	29 December 2020 (subject to Market Disruption Event provisions)

Redemption

The Investor is entitled to receive from the Issuer on the Redemption Date an amount in the Settlement Currency, according to the following scenarios:

Scenario 1	If an Early Redemption Event has occurred , the Product will be early redeemed at 100% of the Nominal in cash on the next Bonus Payment Date following the Early Redemption Event.
Scenario 2	If no Early Redemption Event has occurred and the Expiration Values of all Underlyings are at or above the Strike Level, the Investor will receive 100% of the Nominal in cash on the Redemption Date.
Scenario 3	If no Early Redemption Event has occurred and the Expiration Value of one or more Underlyings is below the Strike Level, the Investor will receive on the Redemption Date an amount equivalent to the Expiration Value of the Underlying with the worst performance since the Pricing Date taking into account the relevant Conversion Ratio.
Expiration Value	Official closing level of the relevant Underlying on the Expiration Date published by the Index Sponsor(s), as reasonably determined by the Calculation Agent.

Early Redemption Event An Early Redemption Event shall be deemed to occur, if on any of the Observation Dates (including the Expiration Date) the closing price of all Underlyings is **at or above** the respective Early Redemption Level, as reasonably determined by the Calculation Agent. In this case the Product will be early redeemed on the Bonus Payment Date immediately following the relevant Observation Date.

Product Structure

The Low Strike Certificate with Early Redemption Feature is a product that offers an attractive return if on any Observation Date all Underlyings close at or above a predefined Bonus Level. In this case the Investor will receive a fixed Bonus payment for this period. Bonus Payments that were missed in earlier periods may be caught up provided that all Underlyings close at or above the Bonus Level on any subsequent Bonus Payment Observation Date.

Should all the Underlyings close at or above a predefined Early Redemption Level on any Observation Date, the product will redeem early.

If no such event occurs, the Investor will still receive 100% of the Nominal on the Redemption Date provided that the Expiration Values of all Underlyings are at or above the relevant Strike Level.

If the Expiration Value of one or more Underlyings at below the relevant Strike Level, the investor will receive an amount equivalent to the Expiration Value of the worst performing Underlying, taking into account the Conversion Ratio. In this case, Investors may lose some or all of their investment.

Public Offering	information on such adjustments is to be found in the Product Documentation.
Distribution Fee	Switzerland 0.17% p.a., fee included in the Issue Price

Tax Treatment Switzerland

Bondfloor at issue	93.74% (USD 937.40 per Nominal)
Swiss Transfer Stamp Duty	The Product qualifies as a taxable security (bond). In principle secondary market transactions are subject to Swiss Stamp Duty
Swiss Income Tax	For Swiss tax purposes this Product is qualified as a combination of an option and a bond, where the majority of the return is in the form of a discount or of one payment on redemption date (IUP). For private Investors resident in Switzerland the increase of the bond floor* at sale or redemption respectively are subject to income tax. However, any gain derived from the option (if an option is included in the Product) is therefore for such Investors considered as capital gain and is not subject to income tax.
	* For Products which are not denominated in Swiss Francs, the bondfloor has to be converted into Swiss Francs at the prevailing exchange rate at sale or redemption and at purchase.
Swiss Withholding Tax	This Product is not subject to the Swiss Issuer Withholding Tax. It depends on the jurisdiction of the issuer whether a foreign issuer withholding tax applies.

The tax information only provides a general overview over the Swiss tax consequences linked to this Product based on the tax laws and the practice of the tax administration at the time of issue. Tax laws and the practice of tax administrations may change, possibly with retroactive effect.

Classification

This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 ff of the Swiss Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the CISA. Moreover, Investors in this Product bear the issuer risk.

Furthermore, this Product does not benefit from any depositor protection under Art. 37a under the Swiss Federal Law on Banks and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this Product.

2. Prospects of Profits and Losses

Market Expectation	Investors in this Product expect the Underlyings to trade sideways.
Effect of the performance of the Underlyings on redemption amount or on delivery obligation:	
- Positive performance	If all Underlyings perform positively, Investors realise a positive return.
- Sideways to slightly negative performance	If the worst performing Underlying performs sideways to slightly negative, but trades above the Strike Level, Investors still realise a positive return.
- Pronounced negative performance	If the worst performing Underlying performs negatively, Investors may lose some or all of their investment.
Maximum Return	The profit potential is limited to the Bonus Payment(s).
Maximum Loss	Investors may lose some or all of the investment as they are fully exposed to the performance of the worst performing Underlying.

3. Significant Risks for Investors

General risk warning	Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further risks are set out in the Product Documentation.
Risk Tolerance	Investors in this Product should be experienced Investors and familiar with both

derivative Products and the stock markets. Although Investors may benefit from a predefined Bonus Payment, they must be willing to make an Investment that is exposed to the full down-side risk of the worst performing Underlying.

A high Bonus Payment can indicate a higher risk, in that the rate of the Bonus relative to the rate of the risk-free return indicates the overall risk of the Product.

Multiple Underlyings (with worst-of feature) allow for a higher return, but at the same time increase the overall risk to Investors.

Product specific risks

Loss Potential	Investors may lose some or all of the investment as they are fully exposed to the performance of the worst performing Underlying.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	The Kick-In Levels limit the risk exposure compared to a direct investment. However, once the Kick-In Level is touched, the risk potential is similar as with a direct investment in the worst performing Underlying.
Issuer Call right	None, but an automatic Early Redemption may occur.
Stop Loss Event	None
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the termination date.
Adjustment risk	Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.
Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.</p> <p>Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.</p> <p>In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.</p>
Market Disruption risk	Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product

Documentation.

Withholding tax Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). **Any payments due under this Product are net of such tax.** Please refer to the General Terms and Conditions for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.

Risk Factors relating to the Issuer

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank pari passu with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website (www.ubs.com) under "Analysts & Investors".
