Redemption

The Investor is entitled to receive from the Issuer on the Redemption Date an amount in the Settlement Currency, according to the following scenarios:

Scenario 1	If an Early Redemption Event has occurred , the product will be early redeemed at 100% of the Nominal in cash on the next Coupon Payment Date following the Early Redemption Event.
Scenario 2	If no Early Redemption Event has occurred and the Expiration Values of all Underlyings are above the Kick-In Level, the Investor will receive 100% of the Nominal in cash on the Redemption Date.
Scenario 3	If no Early Redemption Event has occurred and the Expiration Value of one or more Underlyings is at or below the Kick-In Level, the Investor will receive on the Redemption Date an amount equivalent to the Expiration Value of the Underlying with the worst performance since the Pricing Date taking into account the relevant Conversion Ratio.
Expiration Value	Official closing value of the relevant Underlying on the Expiration Date on the Related Exchange, as determined by the Index Sponsor(s).
Early Redemption Event	An Early Redemption Event shall be deemed to occur, if on any of the Observation Dates all Underlyings close at or above the Early Redemption Level, as reasonably determined by the Calculation Agent. In this case the product will be early redeemed on the next Coupon Payment Date following the Early Redemption Event.

Product Structure

The Kick-In Certificate is a product that offers an attractive return if on any Observation Date all Underlyings close at or above a predefined Coupon Level. In this case the Investor will receive a fixed Coupon Payment for this period. Coupon Payments that were missed in earlier periods may be caught up provided that all Underlyings close at or above the Coupon Level on any subsequent Observation Date.

Should all Underlyings close at or above a predefined Early Redemption Level on any Observation Date, the product will redeem early.

If no such event occurs, the Investor will still receive 100% of the Nominal on the Redemption Date provided that the Expiration Values of all Underlyings are above the relevant Kick-In Level.

If the Expiration Value of one or more Underlyings is at or below the Kick-In Level, the investor will receive an amount equivalent to the Expiration Value of the worst performing Underlying, taking into account the Conversion Ratio.

3. Significant Risks for Investors

General risk warning	Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further risks are set out in the Product Documentation.
Risk Tolerance	Investors in this Product should be experienced Investors and familiar with both derivative products and the stock markets. Investors must be willing to make an investment that is exposed to the full downside risk of the Underlying. A high Coupon can indicate a higher risk, in that the rate of the Coupon relative to the rate of the risk-free return indicates the overall risk of the product.

Product specific risks

Loss Potential	Investors may lose some or all of the investment as they are fully exposed to the performance of the Underlying.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	The Kick-In Level limits the risk exposure compared to a direct investment. However, once the Kick-In Level is touched, the risk potential is similar as with a direct investment in the Underlying.
Issuer Call right	None, but an automatic Early Redemption may occur.
Stop Loss Event	None
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the termination date.
Adjustment risk	Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.
Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.</p> <p>Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.</p> <p>In case of a secondary market transaction, there is a possibility that costs,</p>

Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.

Any payments due under this Product are net of such tax. Please refer to the General Terms and Conditions for detailed information.
