#### Redemption

The Investor is entitled to receive from the Issuer on the Redemption Date an amount in the Settlement Currency, according to the following scenarios:

Scenario 1	If <b>an Early Redemption Event has occurred</b> , the product will be early redeemed at 100% of the Nominal in cash on the next Coupon Payment Date following the Early Redemption Event.
Scenario 2	If <b>no Early Redemption Event</b> has occurred and the Expiration Values of <b>all</b> Underlyings are <b>at or above</b> the Strike Level, the Investor will receive 100% of the Nominal in cash on the Redemption Date.
Scenario 3	If <b>no Early Redemption Event</b> has occurred and the Expiration Value of <b>one or more</b> Underlyings is <b>below</b> the Strike Level, the Investor will receive on the Redemption Date an amount equivalent to the expiration value of the Underlying with the <b>worst performance</b> since the Pricing Date taking into account the relevant Conversion Ratio and the Gearing.
Expiration Value	Official closing value of the relevant Underlying on the Expiration Date on the Related Exchange, as determined by the Calculation Agent.
Early Redemption Event	An Early Redemption Event shall be deemed to occur, if on any of the Observation Dates all Underlyings close <b>at or above</b> the Early Redemption Level, as reasonably determined by the Calculation Agent. In this case the product will be early redeemed on the next Coupon Payment Date following the Early Redemption Event.

## Product Structure

The Low Strike Certificate is a product that offers an attractive return if on any Observation Date all Underlyings close at or above a predefined Coupon Level. In this case the Investor will receive a fixed Coupon Payment for this period. Coupon Payments that were missed in earlier periods may be caught up provided that all Underlyings close at or above the Coupon Level on any subsequent Observation Date.

Should all Underlyings close at or above a predefined Early Redemption Level on any Observation, the product will redeem early.

If no such event occurs, the Investor will still receive 100% of the Nominal on the Redemption Date provided that the Expiration Values of all Underlyings are at or above the relevant Strike Level.

If the Expiration Value of one or more Underlyings is below the Strike Level, the investor will receive an amount equivalent to the Expiration Value of the worst performing Underlying, taking into account the Conversion Ratio and the Gearing.

In addition to a standard Low Strike Certificate, this Low Strike Certificate contains an early redemption feature: If the closing prices of all Underlyings are on any Observation Date at or above the Early Redemption Level, this Low Strike Certificate will early redeem at 100% of the Nominal in cash.

## Tax Treatment Switzerland

Bond floor at issue	93.54% (USD 935.43 per Nominal)
Swiss Federal Stamp Duty	For Swiss Stamp Duty purpose, the product is treated as analogous to a bond. Therefore, secondary market transactions are in principle subject to Swiss Stamp Duty (TK22).
Swiss Federal Income Tax	For tax purposes this product is qualified as a combination of an option and bond, where the majority of the return of the bond part is in the form of a discount or of one payment on redemption date (IUP). For private investors with tax domicile in Switzerland the increase of the value of the bond part (according to the "Modifizierte Differenzbesteuerung") at sale or maturity is subject to Swiss federal as well as cantonal and communal income tax. Such an investor is taxed on the difference between the bondfloor at purchase* and the bond floor at sale or redemption*. However, any gain derived from the option is considered as capital gain and is therefore for such investors subject to neither Swiss federal nor cantonal and communal income tax.  * each to be converted into CHF at the prevailing exchange rate at purchase and sale or redemption (if applicable).
Swiss Withholding Tax	The product is not subject to the Swiss Withholding Tax.

The tax information only provides a general overview of the potential tax consequences linked to this product at the time of issue. Tax laws and tax doctrine may change, possibly with retroactive effect.

## Classification

This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 ff of the Swiss Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the CISA. Moreover, Investors in this Product bear the issuer risk.

Furthermore, this Product does not benefit from any depositor protection under Art. 37b under the Swiss Federal Law on Banks and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this Product.

## 2. Prospects of Profits and Losses

Market Expectation	Investors in this Product expect all Underlyings to trade sideways. In any case Investors expect that none of the Strike Levels will be breached at Expiry.
Effect of the performance of the Underlying on redemption amount or on delivery obligation:	
- Positive performance	If all Underlyings perform positively, Investors realise a positive return.
- Sideways to slightly negative performance	If all Underlyings perform sideways to slightly negative, Investors still realise a positive return.
- Pronounced negative performance	If one of the Underlyings performs negatively and additionally a Strike Level has been breached at Expiry, Investors may lose some or all of their investment (irrespective of the performance of the other Underlyings).
Maximum Return	The profit potential is limited to the coupon payment(s).
Maximum Loss	Investors may lose some or all of the investment as they are fully exposed to the performance of the worst performing Underlying.

## 3. Significant Risks for Investors

General risk warning	Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further
----------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Risk Tolerance risks are set out in the Product Documentation.

Investors in this Product should be experienced Investors and familiar with both derivative products and the stock markets. Although Investors benefit from a predefined, regular coupon payment, they must be willing to make an investment that is exposed to the full down-side risk of the worst performing Underlying.

A high coupon can indicate a higher risk, in that the rate of the coupon relative to the rate of the risk-free return indicates the overall risk of the product.

Multiple Underlyings (with worst-of feature) allow for a higher return, but at the same time increase the overall risk to Investors.

### Product specific risks

Loss Potential	Investors may lose some or all of the investment as they are fully exposed to the performance of the worst performing Underlying.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	The Strike Levels limit the risk exposure compared to a direct investment. However, once one of the Strike Levels is breached at Expiry, the risk potential is similar as with a direct investment in the worst performing Underlying.
Issuer Call right	None, but an automatic early redemption might occur
Stop Loss Event	None
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the termination date.
Adjustment risk	Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.
Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.</p> <p>Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.</p> <p>In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.</p>
Market Disruption risk	Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value

or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.

#### Withholding tax

Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). **Any payments due under this Product are net of such tax.** Please refer to the General Terms and Conditions for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.

### **Risk Factors relating to the Issuer**

---

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank pari passu with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website ([www.ubs.com](http://www.ubs.com)) under "Analysts & Investors".
