For product specific risks please see above (2. Prospects of Profits and Losses)

#### Risk Factors relating to the Issuer

---

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank pari passu with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website ([www.ubs.com](http://www.ubs.com)) under "Analysts & Investors".

#### Secondary Market

---

The Issuer or the Lead Manager, as applicable, commits, under normal market conditions, to provide bid and offer prices for this Product on a regular basis and ensures liquidity in the secondary market. However, in case of market disruption events, any other unforeseen extraordinary events or force majeure, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.

In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks of the Issuer.

#### Market Risk

---

The investor is exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), adjustments and early termination which could have an impact on the redemption amount through delay in payment or change in value. For a detailed description of such events and their effects please read the Product Documentation.

The calculation methodology of each Long Strategy Component is based on the BCOM as further described in the Bloomberg Commodity Index Methodology (in particular "Chapter 1. Overview of the Index") (the "BCOM Technical Document") as amended from time to time and as published on the BCOM Website. Each Long Strategy Component rolls on Index Business Days 1st, 2nd, 3rd, 10th and 11th of each commodity roll month at a rate of 20% per Index Business Day (except for January where it follows the BCOM rolling schedule). A Commodity Index Multiplier of 1 is applied to each Long Strategy Component.

The Strategy Basket level on 16 March 2016 is 121.3497.

In respect of any other Strategy Business Day t:

$$\text{StrategyBasket}_t = \text{StrategyBasket}_r \times [1 + \sum W_i \times \text{Performance}_{i,t}]$$

Where:

$W_i$  is the weight of the  $i^{\text{th}}$  commodity in the Strategy Basket as of the previous Rebalance Date  $r$  and shall be equal to 11.1111%

$\text{Performance}_{i,t}$  means the relative performance of the  $i^{\text{th}}$  Long Strategy Component to the  $i^{\text{th}}$  Short Strategy Component since the previous Rebalance Date  $r$ . It shall be calculated using the formula below:

$$\text{Performance}_{i,t} = \frac{\text{LongStrategyComponent}_{i,t} - \text{ShortStrategyComponent}_{i,t}}{\text{LongStrategyComponent}_{i,r} - \text{ShortStrategyComponent}_{i,r}}$$

The Strategy Basket is rebalanced on the last Strategy Business Day of each calendar month (the "**Rebalance Date**").

*LongStrategyComponent* and *ShortStrategyComponent* levels used above are rounded to 4 decimal places for calculation of *Performance*

**Strategy Business Day** means a day on which BCOM is published.
