Expiration Date ("Expiry")	21 September 2018 (subject to Market Disruption Event provisions)
Redemption Date/ Maturity Date	28 September 2018 (subject to Market Disruption Event and FX Disruption Event provisions)

Redemption

Warrantholders are entitled to receive from the Issuer on the Redemption Date the Redemption Amount in the Redemption Currency, according to the following formula:

Option Right: Warrantholders shall have the right (the "**Option Right**") to receive the Redemption Amount commercially rounded to two decimal places in cash in the Redemption Currency insofar as the Expiration Value of at least one of the Underlyings is below its prevailing Strike Level, otherwise the Products expire worthless.

Redemption Amount: The Redemption Amount is calculated in accordance with the following formula:

$$NA * \sum_{j=1}^3 \left(\text{Weight}(j) * \text{Max} \left[0, \frac{\text{Strike}(j) - \text{Final}(j)}{\text{Initial}(j)} \right] * \frac{\text{InitialFX}(j)}{\text{FinalFX}(j)} \right)$$

Where:

NA:	Notional Amount
Weight(j):	Weight of Underlying (j)
Strike(j):	Strike Level of Underlying (j)
Initial(j):	Initial Underlying Level of Underlying (j)
Final(j):	Expiration Value of Underlying (j)
InitialFX(j):	Initial FX Level with respect to Underlying (j)
FinalFX(j):	Final FX Level with respect to Underlying (j)

Final FX Level: The Final FX Level will be the prevailing FX rate for each Underlying (USD/EUR for DAX, USD/JPY for Nikkei 225 and USD/HKD for Hang Seng China Enterprises Index, being the relevant amount of foreign currency per 1 USD) on the Expiration Date, as determined by the Calculation Agent in its own discretion acting in good faith and in a commercially reasonable manner, and subject to FX Disruption Event provisions.

Expiration Value: The official closing level of the relevant Underlying on the Expiration Date as published by its Index Sponsor(s) (whereby 1 index point refers to 1 unit of currency in which the Underlying is denominated), as determined by the Calculation Agent in its own discretion acting in good faith and in a commercially reasonable manner.

Product Structure

This Combo Put Warrant represents a basket of Put Options. Every embedded Put Option references an Underlying, has its own Strike Level and its own Weight. At maturity, the Redemption Amount corresponds to the sum of the weighted intrinsic values of the different Put Options (Strike Price minus the Expiration Value of the respective Underlying), taking into account potential currency risk.

Before expiry, the Value of the respective Put Options and therefore of the Combo Put Warrant may be influenced by many factors, inter alia the levels of the Underlyings, interest rates, dividend assumptions, volatility and the time to expiry. Therefore, the Combo Put Warrant's value may not move in line with the rise/fall of the Underlying Levels.

With Combo Put Warrant Investors can benefit from falling markets. Due to the leverage factor the yield potential is disproportionately higher than with a direct investment in the corresponding Underlyings. This Product is suitable for Investors with a high level of risk tolerance who want to invest a small amount in the Underlyings but still want to remain flexible in either benefiting from trends or hedging portfolios against price fluctuations.

Investors are exposed to the corresponding FX exchange rate between the currency in which the respective Underlyings are traded and the Redemption Currency.

This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 ff of the Swiss Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the CISA. Moreover, Investors in this Product bear the credit risk of the Issuer.

Furthermore, this Product does not benefit from any depositor protection under Art. 37a under the Swiss Federal Law on Banks and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this Product.

2. Prospects of Profits and Losses

Market Expectation	Investors expect the Underlyings to decrease in value over the life of the Product and accordingly expect to benefit from a leveraged performance relative to the Underlyings. Investors should note that the volatility of the Underlyings and the remaining time until Expiry will influence the value of the Product.
Effect of the performance of the Underlyings on the Redemption Amount at Maturity:	
- Positive performance	In case all of the Underlyings close at or above their respective Strike Level at expiry, the value of the Product will be zero and the Warrants expire worthless.
- Negative performance	In case all or at least one of the Underlyings close below the Strike Level at expiry, investors will receive a Redemption Amount. For the avoidance of doubt, the Redemption Amount can be less than the Issue Price.
Maximum Return	The profit potential is limited due to the fact that the value of the Underlyings cannot fall below zero.
Maximum Loss	In case all Underlyings close at or above their respective Strike Levels on the Expiration Date, the Product expires worthless.

3. Significant Risks for Investors

General risk warning	Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further risks are set out in the Product Documentation.
Risk Tolerance	Investors bear a high risk of losing their entire investment in this Product. Investors should be experienced and familiar with both leverage products and the underlying asset class of this Product.

Product specific risks

Loss Potential	Investors can lose all of their initial investment.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	Due to the leverage factor, the value of the Product generally fluctuates more than the value of the Underlying. An investment in the Product therefore bears a higher risk than a direct investment in the Underlying. The Product may become worthless, while the Underlying still has a value.
Issuer Call right	None
Knock-Out Event	None
Currency risk	As the Redemption Currency is different from the currency in which the Underlying is denominated, the value of this Product is exposed to the corresponding FX exchange rate.
Extraordinary termination risk	The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not

Adjustment risk	<p>entitled to request any further payments on the Product after the termination date.</p> <p>Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.</p>
Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.</p> <p>Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.</p> <p>In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.</p>
Market Disruption Event	<p>Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.</p>
FX Disruption Event	<p>Means (i) an event that generally makes it illegal, impossible, impractical or inadvisable to convert one unit of the currency in which an Underlying is denominated (the "Denomination Currency") into the Redemption Currency; or an event that generally makes it impossible to deliver the Redemption Currency from accounts in which they are held to accounts outside of the jurisdiction of the Denomination Currency; or (ii) the general unavailability to exchange the Redemption Currency at a spot rate (applicable to the purchase of the Redemption Currency for the Denomination Currency) in any legal currency exchange market in the principal financial centre for the Denomination Currency, if, in the determination of the Calculation Agent, the occurrence of any such events is material.</p>
Withholding tax	<p>Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). Any payments due under this Product are net of such tax. Please refer to the Product Documentation for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.</p>

Risk Factors relating to the Issuer

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank *pari passu* with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website (www.ubs.com) under "Analysts & Investors".
